City gas players may cut prices amid hike in APM gas supply

FE BUREAU
New Delhi, August 11

PAYING HEED to the demand of the city gas distribution (CGD) entities, the government has approved higher allocation of domestic natural gas for CGD used as transport sector and PNG used by households for cooking and international ports for liquefied natural gas (LNG) have soared. With CGD firms likely passing on the benefit to consumers, CNG's competitiveness against petrol & diesel will rise and spot volumes, experts said.

However, the move may inflate the cost of gas-based power and urea, and have fiscal implications. "The government has taken steps to augment the supply of domestic gas for the CNG/PNG/CGD segment of the CGD sector. For Q2FY23, an allocation of 20.74 mmscmd has been made which would cater to 94% of total requirement of 23.1 mmscmd (103.5% of 23.56 mmscmd consumption in Q3) of CGD entities as increased from 85% to Q1. The entities may procure the additional requirement of natural gas from open market," the government said in a notification.

"The increased allocation of APM gas to the CGD sector is expected to reduce the input cost for the CGD entities. The entities are, in turn, expected to pass on the benefit to the consumers."

The government's move follows a significant increase in domestic CNG and PNG prices in the last one year as operators used cheaper imported LNG. CNG prices in Delhi went up from ₹43.40 per kg in July 2021 to ₹75.81 per kg now. CNG prices also rose by 70% in the period from ₹39.66 per standard cubic meter to ₹50.39 per m.

The ministry also said that the available compressed bio gas (CBG) procured by GAIL as part of a synchronisation scheme shall form part of the supply pool. Commenting on the government's latest move, Kishore said, "The rise in APM domestic gas mix shall likely rise to 94% of overall CNG/PNG domestic (CGD) consumption from around 85% now. This should fuel CGD's (LNG/MGL) margins due to low procurement cost. Besides, CGD shall pass on price benefit arising from higher APM mix, which would lift CNG's competitiveness against petrol/diesel, spurring more volumes."
